

Mindy Mohr

UI/UX Frontend Designer & Developer

San Jose, CA | moreminttea@gmail.com • moreminttea@github.io • [linkedin.com/in/mindymohr/](https://www.linkedin.com/in/mindymohr/)

EXPERIENCE

UI/UX Frontend Developer | InfoIMAGE Inc.

November 2023 - Present

- Optimized UX for a billing platform by auditing user pain points and engineering user-tested UI solutions in React to bridge legacy features with an accessible, modernized design system
- Collaborated cross-functionally with product teams to design Figma prototypes against client goals, ensuring technical implementations adhere to UX best practices and design intent
- Initiated a React component library and Storybook site distributed through npm to standardize design consistency and branding while accelerating front-end workflows for internal product teams
- Led and launched the end-to-end redesign of a legacy mail-scheduling tool, translating complex, outdated workflows into a modern React application, resulting in a more streamlined, user-centric experience

UX Prototype Designer Intern | Cisco AppDynamics

June 2022 - March 2023

- Authored an accessibility-first theming workflow in Figma for an internal APM product and presented research on inclusive design standards for the engineering team
 - Automated the visibility of Jira tickets within the design library site by clearly mapping feature updates to specific version releases, streamlining transparency and improving cross-team visibility
 - Led the development of a component library reference site from Figma wireframing and prototyping to React implementation, facilitating design sprints with engineers to ensure successful deployment
-

EDUCATION

B.S. Computer Science | University of California, Davis

September 2019 - March 2023

- **Cumulative GPA:** 3.698 (2x Dean's Honors List)
 - **Coursework:** Web Programming, HCI, 3D Computer Graphics, Character Animation, Data Structures, Algorithm Design & Analysis, Object-Oriented Programming, Operating Systems
-

PROJECTS

KINGPIN | [Collaborative World-Building Site](#)

2022, 2025 – Present

- Leading the development of a collaborative storyscape site built from scratch with React and deployed via GitHub Pages to host interactive character, story, and world-building data
 - Designing end-to-end UI/UX and custom visual assets, iterating high-fidelity wireframes in Figma and creating original hand-drawn digital illustrations using Adobe Creative Cloud and Fresco
-

SKILLS

Technical

- **Languages:** JavaScript (ES6+), TypeScript, HTML, CSS, SASS
- **Libraries & Frameworks:** React.js, Ant Design, Material UI, Tanstack, Redux, Jest, React Testing Library, D3
- **Tools:** Git, Github, Gitlab, npm, Storybook

Design & UI/UX

- **Tools:** Figma, Adobe Creative Cloud (Illustrator, Photoshop, XD, Fresco), Autodesk Maya
- **Other:** Developer-Designer Collaboration, Design-to-Code Handoff, Design Systems, UI Engineering, Prototyping, Wireframing, User Research, WCAG Accessibility, Illustration
